## What Ails the Oil Business

That something is radically wrong with the oil business when the great minds in the country are predicting that the supply of refinable oil is shorted and can only last thirteen years and nine months at the present rate of exhaustion and consumption, and at the same time there is being brought into the country from Mexico over 400,000 barrels a day, as was the case during November, which includes crude and refined oils.

## OIL AND GAS

Leases - Supplies - Production, Etc.

New casing for sale at below list price. Phone Osage 4444. P. O. Box 282, Tulsa, Okla.—Adv.

Will Trade Oil. Right lots for good car, lots in town with good future, surrounded by gusher well. Turner Investment Co., Hallett, Okla.—Adv.

PRODUCTION WANTED—100 barrels or more, with good acreage. State complete particulars and price in first letter. Address Box 86 N. Tulsa Daily World.—Adv.

DEAVERS & HENDERSON, Drilling Contractors. Open for drilling contracts in Oklahoma. Phone 177, Broken Arrow.—Adv.

Look out for Hallett. district, the oil boom state is all set. Write for our bargain list of real estate and oil properties. Turner Investment Co., Hallett, Okla.—Adv.

Executive—Comptroller—Auditor. Am 38, certified accountant with 15 years' experience as office manager and executive, accustomed to work with difficult problems, mergers, income tax, depletion charges, etc. At present employed; salary \$7,000 per year. Address Box 904 B, care World.—Adv.

For Rent—Nice large new brick one-story store, suitable for wholesale or retail business or garage; very centrally located; an exceptional opportunity. Phone Osage 335 or 445.—Adv.

Oil Lot Sale. Producing royalty lot sale in Jennings, Okla., will open next Thursday, Jan. 20th. Don't miss this exceptional investment opportunity at the right time, place and price. Turner Investment Co., Hallett, Okla.—Adv.

A real pump-out pump job can handle any of them. First class performance. Address Box 903 B, World.—Adv.

We have two attractive drilling propositions in McCurtain county, Oklahoma, where next big pool will be opened up. If interested communicate with Helworth Oil Co., Haworth, Okla.—Adv.

Blocks of leases to drill. Creek, Oklahoma, and Oklahoma counties preferred. Give full written description of lease. Address 903-B, care Tulsa World.—Adv.

For Sale—Casing and line pipe, for immediate shipment out of stock in any quantity. Line pipe from 2 in. to 8 in., inclusive. Casing from 4 1/8 in. to 20 in., inclusive. Try us. We will for less. Phone Osage 4150-4254. L. D. 80. Fernberg Pipe & Supply Co., 519 E. First street, Tulsa, Okla.—Adv.

For your depletion and tax problems, accounting and systematizing call Carl L. Rice, C. P. A., 517 Kennedy Bldg. Phone Cedar 297.—Adv.

Production on proven 180-acre Bartlesville. Sand depth 1,800. Pipeline taking all oil including future drilling. Owners will sell full interest direct. No brokers. Address Box 909-B care World.

A fine drilling proposition. Will give 2,000 acres for a test. Fine geological structure, a sure shot for heavy gas, and probably oil. Just north of Poteau gas field and west of Fort Smith gas field in Sequoyah county. Write or wire for blue print or report or see copy at office of Kirk & Hoover, geologists, Tulsa, Okla. James W. Breidlove, Salinas, Okla.—Adv.

DO YOU NEED a private secretary? Have had ten years' experience, can furnish best of references, position with oil producer or head of such department of oil company preferred. Good salary expected. Address 903-B, care World.—Adv.

Refinery man thoroughly experienced in the manufacturing of light, lubricating oils and wax, also accounting and executive departments would like to communicate with company in need of services of capable man, who can get satisfactory results, to assist or take complete charge of refinery. Address 807-B, care Tulsa Daily World.—Adv.

For Sale by Owner. Everything necessary for drilling a deep test well including complete string of casing, complete string of oil well supply company heavy drilling tools, standard derrick, etc. Located at McGregor, Texas. Used on one well only and all in first class condition. Will make attractive price for quick sale. Address George P. Lamy, 822 Mayo Bldg., Tulsa, Okla. Phone Osage 4422, or J. A. Morehouse, McGregor, Texas.—Adv.

and three abandoned locations. Caddo added three wells while two tests were abandoned. DeSoto scored four producers. Red River two oil wells and Puchacha parish and East Texas a gusher each.

The total of oil fields was 24 completions of which 18 were producing wells yielding 14,000 barrels.

Daily production figures for all districts remain practically stationary for the week. The record was as follows: Caddo light oil, 8,133; Caddo heavy, 12,345; DeSoto, 1,947; Red River, 10,327; Claiborne, 49,248; total, 78,620.

The well which made Eldorado, Ark., the cynosure of all eyes in Dr. Sam T. Husey's No. 1 Armstrong, in 13-17-15 Union county. It came in going about 400 feet over the top of the 123-foot derrick with more than 10,000 barrels production from a depth of 2,223 feet. The sand was 6-16-8, and the well is making 10,000 barrels of gas. This is the second gasser completed by the Texoleen Oil company in this vicinity, the first being located in 13-17-15, and is what looks like a good oil country.

Completes Good Producer at Cushing. The Amerasia Petroleum corporation's No. 1 well, located in the north half of the southeast of 30-18-5, which has been flowing 80 barrels from an uncompleted hole for the past two weeks, owing to the rig burning down, is now completed and is down 300 barrels of oil and 5,000 feet of gas. Sand was found from 2,948 to 2,966 feet.

Back to New York. H. P. Sinclair, accompanied by C. E. Crawley, left for New York last night, after getting a lot of hand information in regard to conditions here and was much impressed with the fact that as things are now, the oil game is getting to be more difficult to play as the years go by. He was also greatly impressed with the wonderful reception he received here, as all his friends were mighty glad to see him and wish him all the prosperity and good luck in the world.

In the Osage. The Finance Oil company and C. B. Peters No. 1 well located in the northwest of 9-23-11 is making 200 barrels per day from the Bartlesville sand. The Finance Oil company and C. B. Peters oil company have a 125-barrel well in their No. 25 located in the southwest of 19-23-9. The No. 1 well of the Finance Oil company and C. B. Peters oil company located in the southwest of 27-17-14 is making 75 barrels natural from the first break in the Mississippi line.

Preparations Completed for Shooting Ralston Wildcat. The Colomble Oil company's wildcat, located in 5-23-5, north of the 12-10, is standing with 2,200 feet of oil in the hole coming from the Skinner sand topped at 3,015 feet, is reported ready to be shot. Tanks have been erected for the oil as there is no pipe line near the well and the showing line near the Skinner sand will be tested. If the shot does not make a good well the hole will be put on down to the Bartlesville sand, which is about 150 feet below the Skinner sand. As this well is so far from the pipe line, and as it would be impossible to get any oil from the Skinner sand, the company to put a pipe line up there under the present conditions. The completion of this well will mean an extensive development for that country for some time.

Pool Northeast of Bristol Making Good Showing. The new pool located three miles northeast of Bristol which was opened by the Wilcox Oil & Gas Co. when it drilled its gasser, located in the northeast corner of the southeast of 13-16-9 on down into the oil sand, now has three producing wells, and is making a total of about 1,500 barrels of oil per day from the three wells, although all of

them are only drilled to a shallow depth in the pay sand. The original well, No. 1 K. Tiger, made an initial production of 750 barrels per day; the second well, No. 1 Price, located in the northeast corner of the southeast of 13-16-9, came in for 500 barrels initial production, and the third well, No. 1 Brunner, located in the southwest corner of the northwest of 13-16-9, is making 400 barrels. The rich pay was topped in all the wells at about 2,810 feet, and none of them have been drilled more than six feet in. Upon the Red River, 10,327; Claiborne, 49,248; total, 78,620.

The well which made Eldorado, Ark., the cynosure of all eyes in Dr. Sam T. Husey's No. 1 Armstrong, in 13-17-15 Union county. It came in going about 400 feet over the top of the 123-foot derrick with more than 10,000 barrels production from a depth of 2,223 feet. The sand was 6-16-8, and the well is making 10,000 barrels of gas. This is the second gasser completed by the Texoleen Oil company in this vicinity, the first being located in 13-17-15, and is what looks like a good oil country.

stories and basement and is a great credit to the city.

Frank H. Taylor, who for the past forty-five years, has been identified with the Oil City Derrick, has accepted a position as publicity man for the Union Oil company of California, and will move to California where he will edit what will be called the "Union Oil News," a monthly magazine, the initial number of which will be issued within a few days. Mr. Taylor is easily the dean of the oil editors. At one time he was associated with Michael Murphy in the Houston properties in Venango county, Pennsylvania. In the early seventies he reported the "puta and calls" of the Petroleum Exchange for the Oil City Derrick, and on the death of the Derrick's oil statistician, Alfred Snell, Mr. Taylor became the head of that department. He has been continuously in the oil business, with the exception of a few years in the early nineties when he acted as secretary for Representative Joseph Ribley.

E. R. Brann, is back from a trip to New York and points in Pennsylvania, and is strong for the future of the oil industry, feeling that the present deflation is only temporary. Mr. Brann is vice-president and local manager of the National Exploration company.

Leo Kaufman, who has long been an authority in the cattle industry, has accomplished what every oil man hopes some day to be able to do, and has taken on in addition to his oil business an interest in the cattle business that will be not only profitable but a recreation. Mr. Kaufman says:

I bought a one-half interest in a herd of registered shorthorn cattle, owned by Wm. S. Fears of Broken Arrow. Mr. Fears is one of the pioneer shorthorn breeders of the state. At the American Royal Live Stock show in Kansas City in November, I purchased several head of registered shorthorn cattle which were on the industry, including a three-year old heifer—"Lavina's Type"—which stood third in her class. These cattle have been added to the Fears herd, which in the future will be known as "Sowokla."

FRICK-REID FRIENDLY SERVICE TO THE OIL INDUSTRY. means that there is friendly co-operation in choosing necessary supplies. Offices this is a help to those who are new to that particular field. To give a Friday night party and there is the friendly spirit of the F-R men.
